summary

Motivated Junior AI Engineer from Hunza with a BS in Computer Science and hands-on experience in Python, deep learning,Machine Learning and deploying AI models into real-world applications. Skilled in data visualization, web API integration, and professional client communication. Passionate about leveraging AI to solve practical problems and contribute to innovative projects.

PROFESSIONAL EXPERIENCE

junior Ai engineer | 2025

AI Intern at Bitlogicx Software House

My role involves designing and developing Retrieval-Augmented Generation (RAG)-based systems, primarily tailored for websites and real-world applications. I focus on integrating AI-driven search and generation capabilities, building and fine-tuning models, and ensuring seamless deployment. I collaborate closely with the team to deliver intelligent, efficient, and user-centric solutions.

EDUCATION

Degree college Hunza

intermediate in computer science

I completed my intermediate education from Degree College Aliabad, Hunza, securing an A grade. This educational background has equipped me with a strong foundation in both computer science and advanced data-driven technologies.

virtual vniversity of pakistan

BSCS in Computer Science

i am in at the 7th Semister in Virtual University of Pakistan in the filed of computer science with gave me practical field experience and give me both strog foundatation in advance Ai technologies.

CERTIFICATES

Ai engineer | 2025

Nactac pakistan

python developer

kaggale
