SUMMARY

Motivated Junior AI Engineer from Hunza with a BS in Computer Science and hands-on experience in Python, deep learning,Machine Learning and deploying AI models into real-world applications. Skilled in data visualization, web API integration, and professional client communication. Passionate about leveraging AI to solve practical problems and contribute to innovative projects.

PROFESSIONAL EXPERIENCE

Juniour AI Engineer | 2025

AI Intern at Bitlogicx Software House

My role involves designing and developing Retrieval-Augmented Generation (RAG)-based systems, primarily tailored for websites and real-world applications. I focus on integrating AI-driven search and generation capabilities, building and fine-tuning models, and ensuring seamless deployment. I collaborate closely with the team to deliver intelligent, efficient, and user-centric solutions.

DevOps & Cloud Deployment

self

Deployment, monitoring, and maintenance of AI applications across cloud environments. Hands-on experience with AWS and Azure services for hosting AI models and web APIs. CI/CD pipeline implementation for automated builds and deployments. Server configuration, containerized application deployment, and environment management for production systems. Ensured high availability, security, and optimized resource utilization.

Freelance AI Engineer

(Upwork)

Delivered AI and ML solutions for global clients, including RAG-based systems and AI chatbots.

Integrated LLMs into real-world web applications with a focus on performance and usability.

Managed end-to-end project delivery from client requirements to deployment

EDUCATION

Govt Boys Degree College Aliabad Hunza

Intermediate in computer science

I completed my intermediate education from Degree College Aliabad, Hunza, securing an A grade. This educational background has equipped me with a strong foundation in both computer science and advanced data-driven technologies.

Virtual University Of Pakistan

BSCS in Computer Science

I am in at the 5th Semester in Virtual University of Pakistan in the field of computer science with gave me practical field experience and give me both strong foundation in advance AI technologies.

SKILLS

- **Programming:** Python
- **AI / ML:** Machine Learning, Deep Learning, NLP, RAG Systems, Generative AI
- **DevOps & Cloud:** AWS, Azure, CI/CD Pipelines, Jenkins, Docker, GitHub actions, code pipeline, Server Deployment, Application Monitoring
- **Web Development:** Flask, REST APIs
- **Data Handling:** Web Scraping, Data Preprocessing
- **Deployment:** Model Deployment, Cloud Hosting, Production Optimization
